

MediExcel offers Mail Order Pharmacy Services

MediExcel Health Plan has established a temporary mail order prescription drug program in the U.S. for vulnerable populations, as a contingency during COVID-19.

The program gives members access to a limited formulary of 100 commonly used maintenance medications for the following conditions:

- Diabetes
- Heart disease
- Hypertension
- Cholesterol
- Women's health
- Mental health

Certain restrictions apply and not all chronic health conditions or maintenance drugs are available. The Mail Order Pharmacy Program will run through December 2020.

Members can call the **Doctor Line** at (619) **365-4346**, and select **option 5** to speak to a physician about mail order eligibility.
